HARRIS MR.
19.6.30.

The State Mining Engineer
PERTH

Australian Blue Asbestos, Wittenoom Gorge.

With Workmen's Inspector Hunter I thoroughly inspected the workings on this property and feel confident that in future complaints will be noticeable by their absence.

Although certain improvements were noticeable, there was still much room for more improvement and I talked in the Manager, Assistant Manager, Underground Superintendent and Workmen's Inspector Hunter and laid down a fairly hard policy and left the management fully acquainted as to what was expected and what repercussions would ensue if that policy was not fulfilled.

As I had already stopped every development place, except two, until adequate ventilation was supplied, I feel confident that the Management now fully understands my methods and knows that supervision must be tightened.

I am satisfied that all matters which were lacking in both underground and milling sections are now being brought up to scratch and Mr. Hunter will pay periodical calls to maintain a high degree of efficiency.

I shall also return to the mine and check up.

(Sgd) J. Forland

DISTRICT INSPECTOR OF MINES.
