March 18, 1977

Mr. Joe Odom
Air Products and Chemicals, Inc.
Pace Plant
Pace, Florida 32570

Dear Mr. Odom:

The liver function tests on the men who were exposed to smoke, dust and vinyl chloride during the first explosion and fire are still bouncing all around. One of the men who had a normal alkaline phosphatase on the initial profile, then had it go way up the second time is now down to normal while the other one still has an elevation. There have been similar vagaries in individual tests. No one has had a sustained abnormality of more than one test. I really don't know what this all means but suggest that we not follow the original flow sheet in these instances of acute exposure and just repeat the liver function tests in another month. I hope this meets with everyone's approval. See you in April! Best personal wishes.

Sincerely,

Barkley Beidleman, M. D.

BB/lm

Dear Joe -

Will be gone until Apr. 5.
Peggy will be leaving Apr. 15.
if you have something
like the pen you gave
Sueley, something with
the Air Products logo on
it, to give Peggy, we'd
certainly appreciate it.

Gratefully,
Sueley S.

March 10, 1976

Dear Joe,

Enjoyed the dinner with you and Floyd Monday night. Thanks very much.

As I mentioned to him the next morning, I find that you might not be able to afford me! I went over some figures and checked them with further Smith. We find that to work out there one morning a week 48 weeks a year would take \$100 an hour or \$300 a week to replace the income I would not receive from that proportionate part of my present practice.
