PLEASE REPLY TO UNDERSIGNED

Mr. Manfred Bowditch
Lead Industries Association
60 East 42nd Street
New York 17, New York

Dear Manfred:

When we were in Chicago, you asked me to find out when the results of our lead chromate experiments would be available. I wrote to Harold Staffee who replied that he had completed the rabbit studies but not the guinea pig ones and that he does not know when he will get to the guinea pig sections. I am sure that he found no cancers, otherwise he would have mentioned it. Unless it is terribly important for you to have these results, it would be much better for him to complete the study before submitting his results to me for analysis. I am sure he has only looked at the lung sections anyway.

Could you please let me know how Tony is? I would like to send him a book while he is in the hospital if he is well enough to read. I gather he is at New York University Hospital, but I do not know the address.

Sincerely yours,

Anna M. Baetjer, Sc.D.
Associate Professor
