Northbrook, Illinois 60062

Dear Joe:

Following our conversation on the phone today I had delivered to me about 10 lbs. of Halonax 1051 (octa-chloro naphthalene--approx. 70% chlorine) and one gal. can of Halonax 1000 (mono and di-chloronaphthalene--approx. 25% chlorine).

I can't find out immediately if these are samples I am supposed to keep and other larger quantities have been forwarded to you. In any case I have forwarded by air express 8 to 10 ounces of each of these materials which you should have sometime Monday.

Best regards.

Sincerely,

Elmer P. Wheeler
