Subject: RE: Pawhuska School Gas Leak Coordination Follow Up Call

Gas seep at the PHS Softball Field

William R Lynn – Minerals Director
 8/29/17

A gas seep on the Pawhuska High School softball field has resurfaced from a well drilled in 1915. The well was originally completed by the Pawhuska Oil & Gas Company through the Indian Territory Illuminating Oil Company on the Pawhuska Anticline in the Pawhuska Oil Pool. The well was first plugged in 1940. The well has seeped gas, been re-entered and plugged three times over the years. Work continues at the present time on the wellsite. The situation is serious mostly

because of the heavy oilfield equipment on the location near the school. Federal and state agencies are working along with the school to insure the safety of the children and everyone involved, also providing technical assistance to resolve the problem as well as funding.

William Lynn
Minerals Director – Osage Minerals Council
