Sarto Robert Flanndon, Ministry of Health & Social Welfare, Div. of Industrial Hygiene, Parliament Bldgs., Quebec City, Canada.

Education and Training - 1928-1932 - Mount Saint Louis College, Montreal, High School
1932-1936 - Ecole Polytechnique de Montreal, B.A.Sc., C.E.
1943-1944 - Harvard Univ., Cambridge, M.S. (San. Eng.)

Professional Experience - Employed by the Ministry of Health & Social Welfare of the Province of Quebec since being graduated from Ecole Polytechnique de Montreal. From 1936 to 1942 was acting as assistant sanitary engineer with the Sanitary Engrg. Div., and was then responsible for the sanitation in the gold mining district of Quebec (Abitibi and Temiscamingue Counties) and had the opportunity to organize the sanitary provisions for four small towns founded during stay in this district. Also had the supervision and maintenance of filtration plants, water works, sewage works, chlorination apparatus and pasteurization plants. In Feb. 1942 was transferred to the Div. of Industrial Hygiene to take charge of the engineering section of that division. Except during studies made at Harvard, has been there since. The work covers the Province of Quebec, and he is responsible for the engineering surveys made in industries in regard to industrial hygiene. Work consists of supervising the work of the engineering and chemist staff of the Div. of Industrial Hygiene.
