Re: [REDACTED]
2704 Jefferson
Cincinnati
Ohio

Dear. Doctor Kehoe:

Mr. [REDACTED] is a metal finisher and welder for the Truck Cab Manufacturing Company, located at Findlay and Dalton Streets. He works on an average of eight to nine hours per day in contact with lead solder and lead solder dust. He wears a mask while grinding and buffing. He has been working with lead, in the form of solder and pure lead, steadily for four years.

He was examined in the office on January 23, 1952. There is no lead line, no colic and no diarrhea but occasional constipation. He has no muscle cramps or neurological signs.

Very truly yours,

Clark S. Fitzmorris
