Kettering Laboratory of Applied Physiology
Eden Avenue
Cincinnati 19, Ohio

Dear Dr. Kehoe:

On Friday evening, December 3rd, I must be in Cincinnati to present a technical paper on the work we are doing and I will appreciate calling on you that afternoon as suggested in your letter of November 26, 1948.

In addition to a review of work necessary to resolve the hazards in handling Vitol, I would like your advice on the policy we should follow toward people who are operating Vitameters outside the Columbus area. These people obtained Vitameters from Columbus by one means or another and now write to us for spare parts, additional Vitol, etc. So far we have not made any material available to them but I am afraid Vitameters will find their way into other parts of the country at least in small numbers and I would like to discuss the problem with you.

I have been unable to contact Mr. Paul Blazer so I do not believe he will be able to meet with us on December 3rd. However, as soon as I can contact him we will select one of the subsequent dates mentioned in your letter.

With all best wishes,

Very truly yours,

C. H. Van Hartesveldt
