

For Better Finished Ware

NO question about it!—Anaconda White Lead and Zinc Oxides function properly. Every day they help do a consistently uniform job in producing quality finished ware.

Over a period of years leading ceramists have regarded these Anaconda products as standard materials for use in making all types of dinnerware, pottery, glass, enamelware and the like. Although this is practical evidence of the quality and dependability of Anaconda Lead and Zinc products,

let them *prove* their merit to you. Technical data and samples of the various Anaconda White Leads and Zinc Oxides will be supplied free on request.
