

August 4, 1962

Mr. George D. Hooper  
Product Engineering  
General Electric Company  
Edmore, Michigan

Dear Mr. Hooper:

Your letter of July 31 poses a problem for me which I must pass back to you. My vacation has been delayed somewhat by various professional responsibilities, but is now arranged definitely, and I dare not postpone it further or allow it to be interrupted. (The past six months have been fairly hectic, and I am in need of a break.) This means that I shall be out of circulation after the 10th of August until just after Labor Day. I am also scheduled to attend one of the Gordon Conferences during the first week of August, so that I shall not be able to visit you until early in September.

Since your problem involves both mercury and lead, I think I should attend to it myself, and therefore unless your situation is urgent, I suggest that we wait until September. Unless I hear from you to the contrary, I shall get in touch with you on my return to Cincinnati and arrange a definite date for visiting you.

Very truly yours,

Robert A. Kehoe, M.D.  
Director
