

## Sources of Help

compiled in July 1968. It should not be considered complete because new courses are continually being offered. For specific, current data, local schools should be consulted directly.

### Correspondence courses

Numerous courses in industrial safety are available through noncredit seminars and workshops, usually sponsored by local organizations and insurance companies, or through credit and noncredit correspondence courses. Specific data on correspondence courses may be obtained from the American Society of Safety Engineers' special report, *Current Trends and Philosophies in Safety Engineering Education* (which is revised periodically), the National Home Study Council, or the National University Extension Association, and from the following sponsors:

#### International Correspondence Schools

Scranton, Pa. 18515 (also Montreal, Quebec and Honolulu, Hawaii)

Massachusetts Department of Education, Division of University Extension, Department of Education Bldg  
Newbury and Exeter Sts
