Re: SPI-VCM/PVC -- EPA and OSHA Matters

Ladies and Gentlemen:

Enclosed herewith are three items received from
Beveridge, Fairbanks & Diamond.

The first is a Memorandum on EPA enforcement of
its emission standard for vinyl chloride. The second is
an article from the Houston Chronicle quoting Jim Tarr,
formerly of the Texas Air Control Board, as stating that
vinyl chloride emissions are 36% uncontrolled in Texas.
The letter covering that article contains a suggestion that
the Manufacturing Technology Committee may wish to reply
to the Tarr statements.

Third is a document entitled "Engineering Control
Technology in Polyvinyl Chloride Polymerization Plants."
As the acknowledgement reveals, this paper was extracted
by Jim Gideon, a NIOSH staff scientist, from a larger piece
addressing the control of occupational exposure to chemicals
in the plastics industry which was prepared by a NIOSH
contractor.

Should you have any questions, comments or sugges-
tions relative to any matter discussed herein, please do
not hesitate to let us know.

Cordially yours,

Joseph E. Hadley, Jr. / dec
