August 10, 1976

Mr. John Ciancia
U.S. Environmental Protection Agency
Region 2
Edison, New Jersey 08817

Dear Mr. Ciancia:

On February 11, 1976 you and some associates took samples of influent and effluent water at our plant at 11 Jackson Road, Totowa, New Jersey, with the intent of measuring PCB content. I am unable to find in our files any record of feedback as to the results you obtained from analysis of these water samples. I would very much appreciate your notifying me of these results.

For your information, results obtained by a commercial laboratory on the duplicate samples left with us were:

RADIAN CORPORATION EPA REG 02

Influent composite:	None detected *	0.95 PPB
Effluent composite:	67. ppb	9.40 PPB
Grab sample from waste collection tank:	12.6 ppm	16.2 PPM

*This sample contained an extraneous unidentified peak, not PCB.

Thank you for your cooperation.

Very truly yours,

CAPACITOR DIVISION
Universal Manufacturing Corp.

N. Ray Clark, Vice President
