Doctor Robert A. Kehoe
University of Cincinnati
College of Medicine
Cincinnati, Ohio

Dear Doctor Kehoe:

It was uncommonly good of you to write me so fully about possible ill effects of Ethyl gasoline. I appreciate the reprint you sent to me. In line with your suggestion, we are getting out a bulletin which, in a general way, supports the warning signs that are in use; this, as an effort to continue a good public health program.

There was one interesting fact that I failed to mention to you which is the habit of some of our employees, pilots and otherwise, who use Ethyl gas in pocket cigar lighters. I would judge that this is a procedure not entirely free from risk.

Thanking you for your cooperation and with kind regards,
I am

Sincerely yours,

Ralph Greene, M.D.
Medical Director.
