Subject: VINYL OPERATING MANUAL - GENERAL PROCESS DESCRIPTION

Attached is a partially typed copy of the 2nd issue of the old unit operating manual general process description, which shows revisions I have made due to your comments. The typist is now working on the revisions shown. I need to have any additional comments by Monday morning, May 3, 1982. This section will be issued in the final form Monday afternoon for use in the training class with the old unit lead operator trainees on Tuesday, May 4, 1982.
