NEW YORK - Pierre R. Wilkins

The other day you received a carbon of a memo to two public relations counselors on the West Coast who are helping me on the current controversy about the alleged contamination of wildlife by polychlorinated biphenyls (PCB). This chemical is our Aroclor sold by Organic.

While I may be repeating the unnecessary, please see that all press inquiries or letters from the public are sent my way. We are keeping a close coordination between one man from Organic, a man in Law and Elmer Wheeler.

Tom C. Ford
