Dr. Arthur J. Verwald
 Detroit Cancer Institute
 Wayne University
 Detroit, Michigan

Dear Art :

We should be thinking about speakers for meetings of this committee in the coming year. Would you be willing to give us a talk on your studies of lung cancer in animals exposed to various dusts ? If so, would October 19 or November 16 be a good date for you ? I am sure that your discussion of this subject would be much appreciated.

As you know, Dr. A. J. Lanza has been close to studies in this field. Quite frankly, I would be grateful for your opinion as to whether he has aided or impeded your work on this subject.

Very sincerely,

Wm. E. Smith, M.D.
