| SUBJECT | Quality Control Safety Report<br>February, 1972 |    |            |         |                                                     |

The following is an outline of Quality Control safety programs that were conducted during February, 1972:

Flemington

Quality Control technicians attended safety meetings along with the Production Department. A review of emergency procedures on short term power failures was conducted.

Burlington

Quality Control technicians attended safety meetings in the laboratory. A continuing review of EOP's was conducted.
