DOC#: AH061

DOCUMENT DESCRIPTION: List of Asbestosis Cases

August 21,1953.

Dr. Maxwell . White
460 Green Lane
Philadelphia 28, Pa.

Dear Dr. White:

In accordance with the thoughts and recommendations which were expressed at the meeting in Philadelphia several months ago on asbestosis I have taken the liberty of reviewing the x-rays of the present and past employees at Asten-Hill. A list of 280 employees was submitted but only x-rays on 235 were available. Of this group it was my feeling that 21 cases or 8.9% showed definite lesions of asbestosis, 6 other cases were questionable. There were x-rays on 135 old employees. Of these 7 cases appeared to be definitely asbestosis or 5.2%. Attached you will find a list of the employees whose x-rays appear significant.

Sincerely yours,

PAT/rs
cc Mr. Nelson.
