Court Reporter

Dear Tom,

Attached is a letter from Mc Keown Plastering withdrawing his bid on the American Museum of Natural History, New York City, N. Y., for asbestos fireproofing.

Had another call today from Air Pollution people in Philadelphia. These people are pouring over all the information they can get their hands on in regard to asbestos.

Prior to granting approval of Monokote for use in Philadelphia; the air pollution people want to see our Monokote being applied. I am planning to take them to see the Newark Airport job next week.

Keep up the pressure to get asbestos out of our Monokote as quickly as possible.

Sincerely,

Jim Cintani

JC/jj
