Why Zonolite® Monokote® fireproofing is as basic as the steel it protects.

The optimum fire protection system still remains the subject of much research and debate. But one fact is recognized: no matter what combination of sprinklers, smoke detectors and other devices are used, there should be no trade-off in basic structural protection. Zonolite® Monokote® fireproofing provides the basic protection needed to maintain the structural integrity of your building.

- ☐ Monokote protects steel columns, beams and decks, which can buckle and fail at 1100° F, and minimizes the chance of costly structural steel repairs.
- ☐ Monokote helps contain fire by minimizing the passage of heat through steel decks and concrete floors.
- ☐ Monokote becomes an integral part of your structure, sheathing supporting members with a permanent, durable, protective, monolithic surface.
- ☐ Monokote is quickly and safely spray applied to desired thicknesses for up to four hours of protection.

Monokote is a proven product, backed by the long and extensive fireproofing experience of W.R. Grace & Co. For complete information on fireproofing that is as basic as the steel it protects, contact your local Zonolite Monokote representative or write Construction Products Division, W. R. Grace & Co., 62 Whittemore Avenue, Cambridge, Massachusetts 02140. In Canada, 66 Hymus Road, Scarborough, Ontario M1L 2C8.
