August 8, 1967

To: All Members of the Lead Health and Safety Committee

Re: An International Study of "Normal" Levels of Lead in Blood and Urine.

At last, the Goldwater-Moover paper on the above subject which was presented in San Francisco on November 1, 1966 has been published. For your information, it appeared on pages 60 through 63 of the July, 1967 issue of the Archives of Environmental Health.

We are ordering reprints of this article so that copies will be available for any who wish to have them.

Very truly yours,

J C Rums

James C. Rumas
Assistant Director
Health and Safety
