a much larger compilation of my documents, so that is not quite accurate.

You are doing me a favor to say it is published. It is not.

Q Okay. So there are no published articles on asbestos?

A That is exactly correct.

Q And you have not written any articles in any peer-reviewed journals in which you discuss asbestos disease?

A Not directly, that is correct.

Q And you have not, I take it, been involved in any epidemiological studies that you have -- that specifically deal with asbestos; is that true?

A Where asbestos was monitored. I have been involved in epidemiological studies where asbestos was a concern, but it wasn't actually monitored.

The Calcasieu Parrish study that we did dealt with asbestos.

Q You told us earlier about animal experiments.
