HACKEL BROS. Model MC

Stationary Batch Mixer

WITH STAINLESS STEEL NON-CONTAMINATING MIXING CHAMBER

for the contractor who wants to "READY MIX" his own materials.

☆ **TOP MOUNTED 100 GAL. WATER STORAGE TANK with "Fast fill valve" fills mixer in 30 seconds or less. Sight gage shows gallons of water used. (Eliminates waiting up to 45 min. to fill tank with hose.) Water tank refills automatically.**

☆ **DESIGNED FOR EASY MATERIAL FILLING (60 bags in 10 minutes) — just drop bags of material into hatch. Bayonet in hatch splits bags in half. Grating keeps bag from falling into mixer.**

☆ **MIX 60 — 25 lb. bags of taping or topping mud in 30 minutes or less.**

☆ **AUTOMATIC TIMING CONTROL — Adjustable to quantity and type of material being mixed. One hour total timing cycle. (No watching necessary — machinery stops automatically.)**

☆ **FAST EMPTYING DRAIN — Mixing blades, with rubber wipers, pitched to push material out of drain.**

SGP 0025391

SPECIFICATIONS

- **MIXING CHAMBER** is made of rust-proof stainless steel and will outlast three ordinary mixing chambers of the same metal thickness.
- **MIXER SHAFT SUPPORT BEARINGS** are of the very finest available and are located outside the mixer.
- **GEAR REDUCTION** arrangement is a totally-enclosed, easily-lubricated unit of the very finest type available.
- **MIXER PADDLES** and **MIXER SHAFT** are of high alloy steel (the mixer paddles have rubber wipers) mixer shafts and blades are also available in stainless steel. (PRICES ON REQUEST.)
- **MAIN SHAFT SEALS** are abrasion resistant, double inverted, pressure lubricated type.
- **ELECTRIC MOTOR** is available in single or three phase. Single phase can be operated at 115 or 230 volts and 3 phase at 220 or 440 volts. Motors have a high starting torque and a very high duty cycle.
- **UNMOUNTED** – Unit is shipped without legs and can be set up on a concrete block platform or a platform made from heavy wooden shoring.

TERMS

- **SHIPPING WEIGHT** is 750 lbs. f.o.b. Milwaukee.
