To: Occupational Health Committee
Manufacturing Chemists Association

Gentlemen:

A short time ago there was a communication concerning comments or position on the proposed standard for asbestos. You will recall that we were not able to prepare anything on this subject as there were few replies from the committee and further, there did not appear to be sufficient observations to refute some of the controversial points in the proposed standard.

The AIHA has appointed a committee to prepare a written report on this subject and I have obtained permission from Dr. Zapp, president of AIHA, to make this available to the committee. A copy is attached for your information. Please note that this is strictly for committee information and should not be made available outside of the committee.

Sincerely yours,

N.V. Hendricks
