

INDUSTRY VOTES FOR GARLOCK 117

PLAINTIFF'S EXHIBIT G-213

For Satisfying, Dependable Service!

IF THERE were elections to pick the valve stem packing that should be used—voting would be little more than a formality, because most engineers and maintenance men have learned from experience that GARLOCK 117 does the job right.

GARLOCK 117 is used on stems of globe and angle valves operating against high-pressure steam, hot or cold water, or oil. It is made from long fibre asbestos yarn, thoroughly lubricated with a special Garlock heat-resisting compound. Furnished either braided or twisted in sizes from $\frac{1}{16}$" up. Specify GARLOCK 117!
