NOV 1 1979

Environmental Affairs

Dear Joe:

In preparing the agenda for The Vinyl Chloride Research Managers meeting to be held in November, it is obvious we should consider the status of discussions with Industrial Bio-Test Laboratories Inc. (IBT). Based on the obvious deficiencies in the study as determined in the partial audit and the summary you prepared July 20, 1979, a letter was sent to IBT by Mr. Edmund Trost, September 11, 1979.

Has any reply been received from IBT? Will a response be received prior to our November (29) meeting so that we can consider it as part of our agenda?

Sincerely yours,

T. R. Torkelson

Note error in date. The Research Coordinators will meet the 28th of November not the 29th. We will have a full agenda so plan on all day. Duffield, Stafford & Adams of ICI plan to attend.
