Subject VINYL COMPOUND SAMPLES

RECEIVED

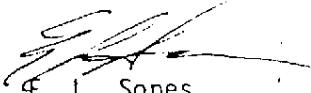

MAR 05 1980

*file
PVC labelling*

I need one 50-lb bag each of two vinyl compounds, 27121 and 16851, sent to my attention as soon as the following conditions can be met:

1. Bagged compound must be shipped to me within one week of production as I must have "fresh" samples.
2. Compound must have been produced from "standard" resins.
3. Residual VCM content in the resin actually entering the blender must be determined on both compounds.

I do not expect both samples to be available immediately or at the same time. Please ship as soon as available however.

E. L. Sones
