You Can Paint Any Room In Half The Time When You Use SPRED SATIN

Painting with SPRED Satin can be a pleasure when you follow these simple steps. You can achieve the finest, most beautiful decorating results and do it in half the usual time.

1 It's easy to select SPRED Satin colors that will harmonize with room fabrics when you use the large, 4-inch Dramatone color chips.

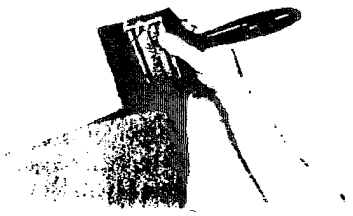

2 Special Dramatone colors can be easily obtained, by simply adding only one tube of Dramatone tinting color to a can of SPRED Satin. Mix thoroughly.

6 When using roller, first paint around ceiling edges with a small brush. Start roller in corner and work across narrow side of ceiling. Overlap strokes 50%.

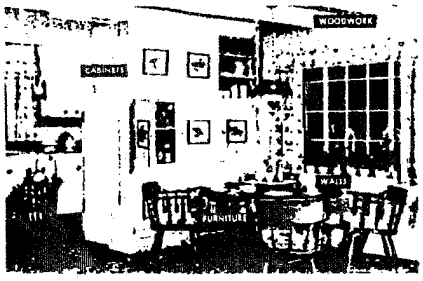

7 Next paint wall corners and area next to woodwork with a small brush. Do not use masking tape. Finish painting with roller or brush.

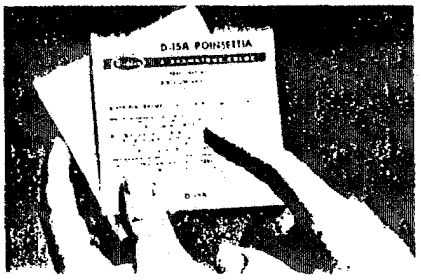

8 When brushing, use a wide brush. Keep brush well filled with paint. Make light finishing strokes toward painted area.

Complete Your Decorating With the soft, rich, glow of SPRED LUSTRE ENAMEL On Woodwork in Colors Matched to SPRED SATIN

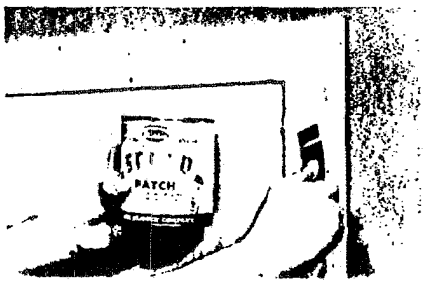

SPRED Lustre Alkyd Semi-Gloss enamel, with its slightly higher sheen on woodwork, offers pleasing contrasts or matching color harmony to SPRED Satin colors on walls and ceilings. Completely washable, its beauty lasts for years!

1 SPRED Lustre Alkyd Semi-Gloss Enamel is ideal for woodwork, cabinets, furniture, plaster walls and metal — interior or exterior.

2 Select SPRED Lustre woodwork colors for perfect harmony with SPRED Satin wall colors. Complete information is given on back of Dramatone color chips.

6 Patch nail holes with SPRED Patch (spackling compound), sand lightly when it is dry. Spot-prime patched areas with SPRED Lustre. Allow to dry.

7 Apply uniformly by brushing in two directions until SPRED Lustre is level and smooth, free of runs and sags. Level off by brushing lightly.

8 On unpainted wood, use first coat of SPRED Lustre without thinning. After overnight dry, apply the finish coat.

GLD011573

3 Remove draperies, curtains, pictures, mirrors, etc. Move furniture to one side and cover. Protect floors with drop cloth or newspapers.

4 Surface to be painted should be clean. Fill holes or cracks with SPRED Patch (spackling compound). Patch deep holes in two stages.

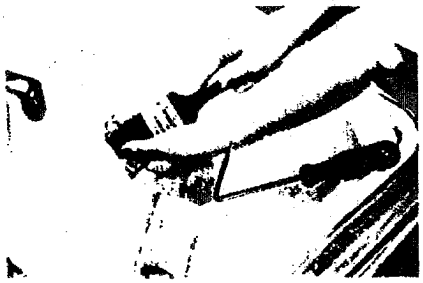

5 Lightly sand patched areas when dry. Wipe off plaster dust, then prime patches with SPRED Satin. Let dry and apply finish coat.

9 If you miss a spot—don't worry. Just touch it up after the paint is dry. The touched-up area will blend in perfectly without showing.

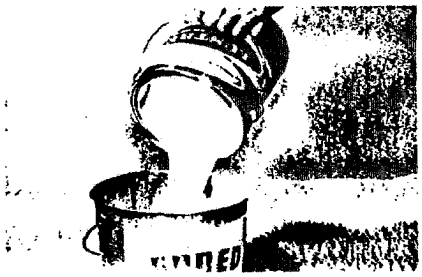

10 If you spatter some of the paint on woodwork or floor, wipe up immediately with a cloth dampened with water.

11 It's easy to clean SPRED Satin from paint tools with warm water and soap. Just rinse and you are through.

3 Dramatone tube colors make it easy to create any desired hue. Just add a tube of color to a can of SPRED Lustre as directed. You can't miss!

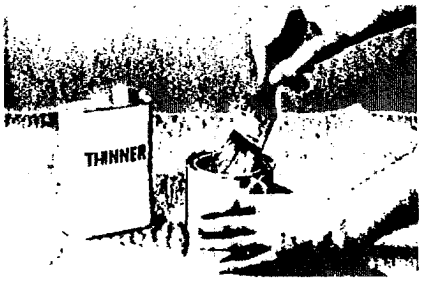

4 Mix colors thoroughly. Best way is to pour SPRED Lustre back and forth from one can into another. Stir occasionally while applying.

5 Clean woodwork before painting. Use SPRED Surfacene. It makes shiny surfaces dull and clean for perfect adhesion; saves job of sandpapering.

9 Prime coats on new surfaces should be sanded lightly after drying, before applying SPRED Lustre. This gives perfect adhesion for finish coat.

10 Clean brushes in kerosene, mineral spirits or turpentine, after painting with SPRED Lustre. Wash with warm water and soap before storing permanently.

And These Are the Benefits You Will Enjoy for Years to Come

GLD011574

Beauty!
Durability!
Washability!

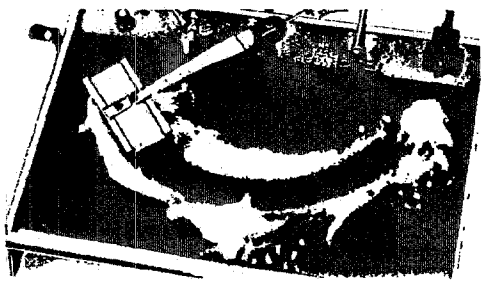

YOU WON'T HAVE TO PAINT AGAIN

. . . until you want to change colors! SPRED SATIN stay-fresh colors are chemically locked into the film with new, exclusive Glidden Poly-Am, nature's wonder ingredient. Colors stay bright and beautiful for years.

CHILDREN CANNOT MAR THE FILM

SPRED SATIN is extraordinarily tough and durable. Blows and furniture bumps that mar, chip and crack ordinary wall paints and enamels do not damage the chip-proof, elastic, latex film. This rubber-like, stay-fresh finish lasts for years.

GUARANTEED WASHABLE

In a rigid test, 40,000 scrubbing strokes on a pastel SPRED SATIN panel failed to change the color, or mar the satiny texture, or in any way affect the finish. This is equal to years of household wear. May be spot-washed repeatedly.

The SPRED family of quality products

SPRED SATIN

SPRED SATIN was the *first* 100% latex paint ever made. For walls and ceilings. It is the easiest-to-use paint in the world! Many SPRED SATIN colors are ready to use, gorgeous pastels and beautiful, rich deep tones. Hundreds of additional colors can be made easily by the exclusive Glidden DRAMATONE color system.

SPRED LUSTRE

SPRED LUSTRE Alkyd Semi-Gloss Enamel colors are identical with SPRED SATIN colors, for woodwork and furniture. This new finish requires no primer on new plaster or new wood. It is ideal for kitchens, bathrooms, hallways—walls, furniture and metal. The soft, glowing sheen on woodwork makes it the perfect companion finish for SPRED SATIN.

SPRED SURFACENE

SPRED SURFACENE is a clear liquid surface conditioner and brush cleaner. Can be applied to old enameled, painted or varnished surfaces to clean the surface, dull the gloss and insure good adhesion for a new finish coat. Eliminates the work and dust of sanding and prepares the surface for refinishing in one easy operation.

SPRED STIPPLE TEXTURE

Ready to use on new or old surfaces. Gives the advantages of texture and the beauty of paint in one application. Hides irregular surfaces on plaster, wallboard, masonry blocks and wallpaper, seals spackled nail heads and tape joints. May be lightly stippled or heavily textured. Fills voids in masonry blocks to assure maximum water repellency.

SPRED PATCH

SPRED PATCH (a latex spackling compound) is ready to use. Stays pliable for easy use. Will not bleed through paint, does not flash. Dries to a "puff" without shrinking. May be easily sanded. Does not clog sandpaper. Has excellent adhesion. Perfect for filling plaster cracks and nail heads.

SPRED GLIDE-ON

SPRED GLIDE-ON vinyl-latex exterior masonry paint for stucco, concrete, brick, concrete block, cinder block, asbestos shingle and panel siding. Keeps out moisture, yet the surface "breathes" to let vapor escape from inside. This tough vinyl paint applies so easily that you can now paint the exterior of a ranch type, stucco home in a single week-end!
