Dear John,

Our mortality paper has been accepted by the British Journal of Industrial Medicine subject to minor changes, but there are still four men on whom we do not have complete information who might be relevant. Could you let us have dates of employment in scheduled areas for Harry Clegg (born 22.02.1913), Ronald Morrall (born 30.06.1908), and Norman Harland (born 11.09.1909)? Some months ago Hilton told Leo that Fred Butterfield (born 15.08.1883) had a mesothelioma, but we do not have a p.m. report and he is not on your list of cases. Can you confirm this?

Please assure Ian Waters that we are not trying to spoil his Christmas. He has done so much work on this study that I am embarrassed to ask him for anything, but until we have this information we cannot finalise the paper.

Best wishes,

Yours sincerely,

Julian Peto

Dear Julian,

I hope this information will be of value to you.

Fred Butterfield does not appear to have had a mesothelioma according to our records.

Yours sincerely,

J.G. Morris, MD, CEB, MRCS, LECT, DCH, DPM,
MRCOG, MRCGP, MRCP, MRCP, FRCS.
Chief Medical Officer.

HAVE RECEIVED THE FOLLOWING LETTER FROM DR. KINLEN

AS YOU KNOW OUR PAPER HAS BEEN ACCEPTED BY THE BRITISH JOURNAL OF INDUSTRIAL MEDICINE, BUT THEY HAVE ASKED US TO CLARIFY A FEW POINTS. WE HAVE BEEN ABLE TO DEAL WITH THESE WITH THE POSSIBLE EXCEPTION OF ONE STATEMENT THEY WOULD LIKE US TO INCLUDE ABOUT PERITONEAL MESOTHELIOMAS. AM I RIGHT IN BELIEVING THAT NO CASE HAS BEEN RECORDED AT TBA.

COULD YOU PLEASE GIVE HIM THE NECESSARY INFORMATION.
