FROM D. L. Lamp/R. E. Fleming

SUBJECT REMOVAL OF OBSOLETE AND ABANDONED EQUIPMENT FROM OPERATING UNITS

Shown below is a list of abandoned equipment located in the various operating areas. This equipment is not expected to be reused and is consuming valuable plot space.

If the Materials Management Group can sell this equipment as surplus (or junk) to lower or eliminate the demolition cost, then it is recommended it be removed.

Ultraformer Area

P DA-2400 Old Ultraformer Stabilizer
X EA-2403 Stabilizer Reboiler

Platformer Area

DC-1201 Unifiner Reactor (After September)
BA-1201 Prefrac. Depentanizer Reboiler Furnace
BA-1302 Prefrac. BTX Splitter Reboiler Furnace

Alkar Area

BF-1901A&B Styrene Boilers & Associated Equipment
BG-1901 Deareator
BA-1901 Superheaters
BA-1902 Superheaters
DC-1901 Sytrene Reactor (Alloy)
DC-1902 Sytrene Reactor (Alloy)
EA-1901 Feed Preheater
EA-1902 Feed Preheater
FA-1901 Disengaging Pot
FA-1916 Vent Condenser Receiver
EA-1907A&B Dehydro Condensers
FA-1903 Settler
DA-1901 Water Stripper
EA-1909 Water Stripper OH Condenser
EA-1908 Water Stripper Bottoms Cooler
GB-1909 Refrig. Vent Condenser
GA-1904 & S Water Stripper Bottoms Pumps
GA-1902 & S Water Stripper Charge Pumps
GA-1903 Dehydro Product Pump
