SUBJ: DISTRIBUTOR AGREEMENT HAZARD COMMUNICATION LANGUAGE

VISTA

Below is proposed language regarding distributor compliance with the OSHA Hazard Communication Standard.

Vista will provide the distributor with material safety data sheets or comparable information on Vista products. Distributor agrees to promptly disseminate this information to all purchasers and end-users of those products. Distributor shall apply labels as provided by or directed by Vista on all containers to be sold or distributed as a Vista product. Distributor will employ quality control procedures when repackaging any product to be sold or distributed as a Vista product to assure they have the same identity, quality and purity as at the time of their manufacture.

As discussed, this language would be in addition to that already in Section 6(f) of the Distributor Sales Agreement. Feel free to put this in proper legal language.
