---

Per the anecdote from earlier...NPS' response was:

*The existing white color of these structures provides too much contrast with the surrounding environment and we would like to discuss a earth tone color instead.*

**Subject:** RE: SpaceX Texas Launch Site - Change to Undertaking\_PA

All,

To assist with the process and evaluating viewshed, our team sent in some pictures of the currently installed antenna (41 feet tall) from 2 places:

1. The eastern edge (closest to antenna) of the NHL (1.4 miles away)
2. The National Historic Marker (7 miles away)

The antenna is invisible from the Marker and a spec from the NHL (on pages 2 and 4, we added a red arrow to point it out).

For scale on the former, this is equivalent of looking at a laptop screen across a football field.

Please let us know if additional pictures would be useful.

Thanks,  
Steve
