Safety Report on Union Asbestos & Rubber Company, McGregor, Texas

NATURE OF DISCUSSION AND GENERAL REMARKS

The McGregor, Texas Plant of the subject company was reinspected in the interest of accident prevention on Thursday, April 6, 1950, in company with Mr. J. B. Crawford, Plant Manager. Only one recommendation is being made regarding mechanical hazards as a result of this inspection, however, the dust hazard is still serious although an exhaust system is in operation. Our recommendation regarding this situation is for the use of personal equipment until a satisfactory dust collecting system is installed.

Only one accident has been reported from this Plant since the date of our last report and this was of a minor nature, requiring medical First Aid only.

Safety Report of Union Asbestos & Rubber Company, McGregor, Texas Dat April 6, 1950

- | NO. | NEW RECOMMENDATIONS |
|-----|---|
| 1. | <u>Mfg. Department:</u> Two large motors, driving equipment on raw end, should have guards over V-Belt drives although these motors are stop equipment and only subject to accidental contact by employees making adjustments, etc. |
| 2. | <u>General:</u> It is suggested that wearing of respirators by all employees in dusty areas should either be mandatory or encouraged until satisfactory dust removal equipment is available and limit of exposure is known. |
