

PROMET AND PROMET BRONZE

Lorain, Ohio,

June 15th, 1943

IN REPLY REFER TO
FILE NO.

Robert A. Kehoe, M.D.,
University of Cincinnati,
Kettering Laboratory of Applied Physiology,
Eden Avenue,
Cincinnati, Ohio.

Dear Dr. Kehoe:

Thanks very much for your letter dated June 10th and enclosing the analytical results obtained from the four samples of dust which we forwarded to you some time ago.

We note that the sample obtained from the Cleaning and Grinding Room is unusually high in lead content and Mr. Coleman and I are very interested in the results obtained. We like your suggestion of taking several individual samples of dust from different sources in the Cleaning and Grinding Rooms, and these will be forwarded to you in the near future.

Thanking you very much for the help you have been giving us, I am

Cordially yours,

THE AMERICAN CRUCIBLE PRODUCTS COMPANY

Clifford T. Williams
Asst. General Manager
