

November 1, 1967

Mr. H. Wilbur Speicher, Administrator  
Industrial Hygiene  
Westinghouse Electric Corporation  
East Pittsburgh, Pennsylvania

Dear Wilbur:

I am sending you a copy of our inerteen label which you requested in your letter of October 17. This label contains a warning concerning chlorinated hydrocarbons. We feel that such a warning is necessary in any material that contains chemicals of this type. You may want to do likewise in any of your equipment that contains chlorinated hydrocarbons. Monsanto made this decision many years ago to put a chlorinated hydrocarbon warning on products of this type. We feel that this was a wise decision.

If I can be of any specific help, I will be glad to do so.

Sincerely,

Jack T. Garrett, Manager  
Industrial Hygiene  
Medical Department
