As some of you know, Monsanto in general and our Everett plant in particular have become major targets of a vicious attack being waged by Greenpeace. Just how vicious is reflected in the attached Greenpeace literature which is getting widespread distribution in New England, and perhaps nationally, as well.

MCC manufacturing, environmental operations and public affairs are working with plant management at both Everett and Indian Orchard to develop a state-wide strategy to deal with this and other environmental issues facing us in Massachusetts.

DRB.
Dan R. Bishop
