Name: [REDACTED] (Truck Cab Mfg. ^{ny5} Inc.)
Material: Urine and Blood
Submitted: 4-17-52 by Dr. Princi
Required: Lead Analyses

URINE

Analysis Number - 52A-3003
Volume - 114 ml.
Specific Gravity - 1.022
Mg. Pb/Liter - 0.105

BLOOD

Analysis Number	-	52A-3002	
		<u>Spectrographic</u>	<u>Dithizone</u>
Grams	-	10.2	14.9
Mg. Pb/100 Grams	-	0.08	0.07

Stippling: 10 stippled cells/50 fields
Hb: 15.0 g.
RBC: 4,680,000

The concentration of lead in the blood has decreased since the last series of analyses (1-2-52), but at a rate which is so slow as to indicate that his exposure to lead had persisted for a fairly long time. At the present rate of decrease it may be suspected that months of freedom from exposure would be required to reduce the level in the blood to something approaching the normal. The urinary concentration of lead is in keeping with the results on the blood, being near the upper normal level.

Samples Collected: 4-17-52
Samples Received: 4-17-52
Samples Reported: 4-22-52
