Mr. William Ward
Plant Engineering Section
General Motors Technical Center
12 Mile and Mound Road
Warren, Michigan

Dear Mr. Ward:

Confirming your telephone conversation of August 21, 1972 with J. H. Davidson, concerning the incineration of Askarel fluids, we offer a 3¢/pound incineration service for Monsanto PCB* fluids delivered to our Sauget, Illinois plant (Dept. 246). We will charge 5¢/pound to incineration non-Monsanto fluids containing PCB if sent freight prepaid to our Sauget plant. Fluids containing in excess of 2% water are not acceptable.

We cannot handle solids (i.e., sawdust, rags, sludge, insulation or capacitors). For solids, we suggest that you check local authorities and your own environmental department for an approved land fill. Our Sauget plant is instructed to refuse receipt of containers containing solids, and to return same to the sender at the sender's expense.

We request you use return drums that meet DOT 17E Specification (55 gallon drums, 18 gauge minimum, 2 bung head; 5 gallon drums, 24 gauge minimum) to prevent leakage. The outside of the return drums should be free of fluid material and free of leaks. Cleanup or other costs affecting the carrier related to fluid leaking from drums will be charged to the shipper.

When you have fluids for return, please contact me at (314) 694-2514 as to the fluid type, number of drums and any special invoicing procedure you may require. I will send you the necessary pre-addressed drum return labels which we request be used.

Thank you for your cooperation. Please feel free to contact me if you have any additional questions.

Sincerely,

Paul W. Gann
Project Coordinator
Heat Transfer fluids
