

1 mesothelioma and garage workers?

2 I don't know the answer to the first
3 question, but I think one of their own experts has
4 answered the question or given the answer for the
5 second question, and we are back to Dr. Hammar again,
6 the pathologist.

7 I asked him, you are not aware of any
8 epidemiologic studies that show an increased incidence
9 or higher relative risk for auto mechanics contracting
10 mesothelioma, are you?

11 Answer: No, I am not.

12 They didn't have any of their witnesses talk
13 about the studies that Dr. Wong told you about because
14 all of those studies definitively and clearly show
15 that brake and clutch parts don't cause mesothelioma.
16 That is why they didn't talk about it.

17 Brake and clutch parts don't cause
18 mesothelioma, and that is the end.

19 I want to thank you again for your time and
20 attention. You have been most patient.

21 THE COURT: Thank you, Mr. Williams.
