The attached item from Rollins Environmental notifies us that dates materials are taken out of service (and placed in storage for disposal - synonymous most times) will be required to be shown on each item (drum, pallet, transformer, etc.) shipped for disposal.

To facilitate shipping and paperwork and to insure you are in compliance with Federal regulations please be sure this practice is followed. EPA enforcement division is apparently making an issue of the matter of these dates/marking which are specified in the regulations.

Please communicate this information to plant/site personnel responsible for PCB storage/shipment.

J. H. Craddock
