Gentlemen:

I am the company physician for several industrial plants in the Solon, Ohio area. In one of the new plants there will be a constant exposure to lead and it will therefore be necessary to perform periodic blood studies on the employees.

Dr. Joseph Solomayer of the Euclid Industrial Clinic suggested that I write to you requesting that your laboratory perform the serum lead determinations.

Would you kindly forward to me information regarding the drawing of samples, materials, handling, and fees?

Thank you.

Very Truly Yours

Gilbert N. Silbiger M.D.
