

CHEMICAL MANUFACTURERS ASSOCIATION

June 15, 1994

Mr. Stephen K. Harvey
Manager, Environmental Affairs
Zeneca Inc.
Specialty Chemicals
1800 Concord Pike
Wilmington, DE 19897

Dear Mr. Harvey:

On behalf of the Chemical Manufacturers Association, I would like to welcome you as your company's new Environmental Contact. In order for you to obtain a better picture of CMA's overall environmental activities, I am enclosing a copy of the most recent annual report of the Environmental Management Committee and an organizational chart that shows staff assignments.

This contact list includes all of the task groups and work groups organized under the new Environmental, Health, Safety and Operations Committee (EHSOC). This new committee combines all of the functions of the Environmental Management, Health and Safety, and the Engineering and Operations Committees. I have enclosed the charter for that new committee.

While the EHSOC will evaluate and make some modifications to our issue communications efforts, and in our planning efforts, we do not expect any major changes in the task group/work group organization.

As you know, CMA has developed several proactive programs, several of which are in the environmental area. These proactive efforts have now been included in the Responsible Care initiative. Under that initiative, we have adopted, as the Pollution Prevention Code of Management Practices, elements of policies on air quality, waste minimization, and release reduction. While based on existing policies and programs, the Code goes beyond the scope of existing policies/programs, as follows:

- o Good faith implementation of the Code is an obligation of CMA membership. Company implementation of the previous policies/programs was voluntary.
- o The scope of the Code includes all contaminants and pollutants released into the environment, and all hazardous and non-hazardous wastes generated. Each company will establish its own priorities for establishing reductions. Previous efforts were targeted at regulated pollutants

CMA 175509

Page 2

- o The objective of this Code is improved performance through a long-term commitment to reduce wastes and releases, i.e., a downward trend when viewed over time.
- o The Code requires companies/facilities to measure reduction progress.

A copy of the Pollution Prevention Code is attached.

We seek active involvement in our advocacy efforts and Responsible Care® initiative. Please let me know how we can best assist you in maximizing the value of your CMA membership. I will be calling you in the next 1-2 weeks to discuss your involvement in CMA's processes and to discuss your goals as a member. I will be very happy to discuss how your company can become directly involved in these activities.

If you have any questions please do not hesitate to call me at 202/887-1164.

Sincerely yours,

Joe J. Mayhew
Assistant Vice President
