Imported bulls of the beef breeds
 are all too rare in California. Bou-
 quihan Guinea Stamp's calves were
 only just beginning to develop and
 the loss to the state of such a bull
 is difficult to estimate.

the state. In Sacramento county the
 expected total membership of 1500 is
 rapidly being reached, and reports
 from Solano county membership
 drive, which is just being finished,
 indicate that the farm bureau there
 will include better than 90 per cent
 of the farmers, so that county is
 nearly 100 per cent farm bureau in
 its agricultural districts.

REGISTERED vs. SCRUB PAINTS

REGISTERED CATTLE can be told at a glance,
 because their appearance indicates what they are. The
 same is true of Scrubs. Registered Paints and Scrub
 Paints may look alike when they are in the can. They may
 look alike when they are applied to the building. It's Time
 that tells. Registered Paints are paints that are not adul-
 terated. Expensive paints are cheap because they last so
 long.

We are exhibiting this week at the California Live Stock
 Show our Paints and Varnish products that will appeal
 to the breeder of Registered Cattle. When visiting the ex-
 hibition drop in and see what we have to offer. Ask for
 a copy of Fullergram.
