March 28, 1990

Henry Forsyth
ALTC

SUBJECT: GEON 87645

Manual toothbrushes are Class I, medical devices (21CFR 872.6855) and if not labeled as sterilized are exempt from most good manufacturing practices. There are no regulatory restrictions as what may, or may not be used in their production.

Geon 87645 is composed of ingredients to which are acceptable for use in various food contact applications. In my opinion, this compound would also be acceptable for use in toothbrush applications.

To: Wally Badtch

From: Henry Forsyth

Subject: FDA Approval for Refrigerator Crisper Trays

Attached is ~~the~~ the recipe that we intend to use for refrigerator crisper tray compounds. We need Mark 1900 because it passes ~~entire~~ the environmental stress cracking test.

Please send a written opinion on whether this passes ^{as} an FDA compound, which Regulation number applies.

Is this compound

8-23-89

"FDA" for refrigerator

Henry -

165-17-419-1 trans Blue

"ice buckets" ?

would be acceptable for refrigerator crisper trays
