Vandergucht, that was a poor quality film, wasn't it?

A I am not sure what you mean by poor quality. It was an interpretable film.

Q Excuse me?

A An interpretable film.

Q Wasn't it, nonetheless, a poor quality film? It was overpenetrated, they used too much radiation and it really didn't come out as well as it should have?

A It is not the prettiest X-ray I have seen, but entirely interpretable.

Q Now, you talked about Mr. Vandergucht having this disease, pleural disease; am I correct?

A Yes.

Q Now, you reviewed his entire medical records, didn't you?

A Yes.

Q Are you aware that you are the only doctor who ever said he had pleural disease in his lifetime?

A I don't recall seeing anybody else mention it.
