[FERC Rejects PJM's Proposed Tariff Revisions and Initiates Section 206 Proceeding](#)

By [Elizabeth McCormick & Thomas DeVita](#) on July 11, 2018

POSTED IN [GENERATION](#), [MARKET POLICY](#)

On June 29, 2018, FERC rejected proposals by Calpine Corporation ("Calpine") and PJM Interconnection, L.L.C. ("PJM") to address what they view as shortcomings in PJM's capacity markets resulting from what they characterize as state subsidy programs that suppress capacity prices (the "June 29 Order").

[FERC Finds ISO-NE's Tariff May Not Adequately Address Fuel Security Concerns](#)

By [Jamond Perry & Christopher Zentz](#) on July 11, 2018

POSTED IN [GENERATION](#), [RELIABILITY](#)

The Washington Energy Report is a weekly publication written by the Troutman Sanders Federal Energy Regulatory Commission ("FERC") practice that monitors and reports on significant developments in FERC and energy-related matters around the country.

On July 2, 2018, FERC denied ISO New England Inc.'s ("ISO-NE") request for waiver of its Transmission, Markets, and Services Tariff ("Tariff") and instituted a Federal Power Act ("FPA") section 206 proceeding because, according to FERC, the Tariff may be unjust and unreasonable. Specifically, ISO-NE requested waiver of certain provisions in its Tariff in order to delay the retirement of two generating units owned by Exelon Generation Company, LLC ("Exelon") for fuel security purposes. FERC denied the waiver request and preliminarily found that the Tariff did not sufficiently address specific regional fuel security concerns.

FERC Approves Changes to CAISO's Congestion Revenue Rights Auction

By [Russell Kooistra](#) & [Jasmine Hites](#) on July 11, 2018

POSTED IN [MARKET POLICY](#)

On June 29, 2018, FERC approved the California Independent System Operator, Inc.'s ("CAISO") revisions to its congestion revenue rights ("CRR") auction intended to address the shortfall between CRR auction revenues and amounts owed by CAISO to holders of auctioned CRRs. Specifically, CAISO proposed to (1) require CAISO transmission owners to submit all known transmission maintenance outages for the next year by July 1, rather than October 15; and (2) limit the allowable source and sink pairs eligible for the CRR auction to pairs associated with supply delivery and to exclude non-delivery CRR pairs.
