File

Dear Mr. Kick:

This letter serves to confirm tentative specifications on Abex/Pagid formulation 503-1-W as manufactured in Winchester, Virginia, covering your part 18004631A and 18004633A.

Under Purchase Order M-92372, the numbers which can be supplied by our Quality Control people are Specific Cavity 2.3/2.5, Gogan Hardness 20/40 and Acetone Extract 1.25% maximum (unseared data). Please note that these are tentative specifications and are based on the manufacture of a limited quantity of parts to date. As soon as we have manufactured enough pieces to assure ourselves proper specifications, these will be confirmed as the production specifications or changed accordingly. I can assure you that all pieces which you have received to date, meet these tentative specifications.

Very truly yours,

Earle
