

Purposes

Conducts scientific studies and investigations to find ways and means to prevent occupational diseases, and to promote the health of workmen.

Collects and evaluates data on industrial health and serves as a central clearing house for dissemination of this information.

Services

Develops new knowledge needed to combat industrial health problems through scientific research sustained at four leading science centers.

Issues informative reports giving practical engineering measures, medical knowledge, and legal information for preventing industrial diseases and for improving employee health.

Counsel of specialists, comprising Foundation's Engineering, Medical and Legal committees, available within reasonable limits.

Provides monthly abstracts summarizing current literature on occupational health subjects. This is an important labor-saver for company officials. Further, it insures executives against missing vital new developments.

Special problems, surveys, etc., undertaken and supervised for members at cost.

Affiliated companies may turn to one central institution for available knowledge in this field. Membership places a company in contact with many other industrial concerns whose experiences with similar problems often prove helpful.

Broad Problems Require Broad Approach

Air Hygiene Foundation represents an effort by employers, physicians, and engineers to promote the health of the 15 million workmen in "heavy" industry. Healthful working conditions pay dividends to the employer, it is true. But at the same time they contribute to the welfare of the workman, and indirectly to the welfare of his family and the community. Industrial health, per se, is the concern of the individual employer. Yet basically, employee health problems confront all employers through laws and regulations, industrial relations, and public opinion. Plainly then, broad problems demand a broad approach, and call for organized employer action.

Multiple Regression

Purposes

Conducts scientific studies and investigations to find ways and means to prevent occupational diseases, and to safeguard the health of workmen.

- ▶ Collects and evaluates industrial health information and serves as a central clearing house for disseminating these data.
- ▶ Serves as a unifying agent, aiding in the advancement of industrial hygiene on an industry-wide front. The Foundation supplements health work carried on by member companies individually, affording the advantages of organized action.

Services

Develops and distributes knowledge needed to combat industrial ills. Research sustained at present at four leading science centers: The Saranac Laboratory, Harvard School of Public Health, University of Pennsylvania, and Mellon Institute, headquarters of Air Hygiene Foundation.

- ▶ Issues informative bulletins giving practical engineering measures and medical information for controlling employee health hazards. Periodic legal reports analyze occupational disease legislation, trends, compensation, etc.
- ▶ Plant surveys made for members at cost. Special studies undertaken or supervised for members or groups of members.
- ▶ Provides monthly "digest" of latest literature on occupational health. This "news service" reduces hours of reading to minutes, and insures members against missing vital developments.
- ▶ Counsel of specialists, comprising Foundation's Engineering, Medical and Legal Committees, available within reasonable limits.
- ▶ Members may turn to one central institution for available knowledge and assistance and may benefit from the experience of other member companies in dealing with industrial hygiene.

Organized Industry Pays Health Dividends

Air Hygiene Foundation is a partnership of industry and science, formed by employers to protect the health of America's 15 million industrial workmen. Foundation researches, surveys and other membership services aid and augment health programs carried on by companies individually. Law, labor and public opinion call for employee health protection on an industry-wide scale. This can be achieved only through collective as well as individual action—witness the success of the safety movement. Air Hygiene Foundation affords industry an opportunity for voluntary cooperation in furthering industrial health. Collective employer effort promises orderly progress, benefiting management, labor and the common good.
