fibrous products.

Yesterday we called on Mr. Abram Goldberg and Mr. Henry Anderson. Mr. Goldberg is the president and Mr. Anderson is the business agent of the Boston local.

We found that Mr. Goldberg had just recently undergone a lung exploratory operation.

Continuing down further. They also stated that they recently had had X-rays of over 50 percent of their members and that they found quite a few of their members showed a cloudiness in the lungs.

The expression was that there was more shadowy substance in their lungs than in the average persons.

They claim they have another young man who may have to leave the business because of this.

Recently one of their members died and they are having an autopsy performed to determine if he suffered from what they call "asbestitous."

They also informed us that they were working with Mr. Ernest Johnson, the Labor Commissioner of the
